- *Made from Recycled Cotton*
- *Anti-Static*
- *Non-Slip*
- *Highly Absorbent*
- *Waterproof*
- *Highly durable for extended use*
- *Low cost*

Polyroll is a unique and economical new way to protect your floors from accidental spillages of paint, grease, oil, solvent inks etc.

Polyroll is made from regenerated cotton fibres with a high level of absorption with a polythene membrane which stops fluid soaking through and damaging the floor beneath.

Thanks to the thickness of Polyroll, your floor is also protected from possible damage caused by dropped tools, swarf, dirty shoes etc.

Polyroll has a high resistance to abrasion and therefore can be used for extended periods of up to many weeks.

Polyroll is used by Painter/Decorators, Maintenance, Factories, Printers, Workshops and Engineers.

Available in rolls 1m x 25m with absorption capacity of 50 litres
(other sizes available on request)
